

PRODUCT IMPROVEMENT COMMUNICATION

PIC 003: Gripper Fingers

Product Improvement Communications (PIC): The PICs are instituted in order to communicate product improvements, new product developments and the various services E80 Inc. has to offer. It is our goal to be the world's premier provider of solutions that optimize the Value Chain of companies in the Consumer Products industry.

PIC 003: Palletizer Coated Textured Gripper Fingers

Minimize Pack Slippage in the Gripper!

Description:

This Product Improvement Communication (PIC) is targeted at Elettric80 Coated and Textured Gripper Fingers. Rubberized Gripper Fingers provide increased package handling and stability of product when in motion or during placement.

Advantages:

- Easy Installation
- Can be retrofitted to all "fork style" grippers

Benefits:

- Offers enhanced handling of slippery products
- Minimize machine jams and interruptions

Features:

- Coating has a much longer expectancy than the adhesive grip tape, which is more commonly used
