PRODUCT IMPROVEMENT COMMUNICATION

PIC 004: SMART Traffic Manager

Product Improvement Communications (PIC): The PICs are instituted in order to communicate product improvements, new product developments and the various services E80 Inc. has to offer. It is our goal to be the world's premier provider of solutions that optimize the Value Chain of companies in the Consumer Products industry.

PIC 004: SMART Traffic Manager
## *A Smarter SMART!*

Description:

This Product Improvement Communication (PIC) is targeted at SMART technology for LGVs. SMART is an Elettric80 LGV system software controller release, Version 6.40.9531.7, which includes: new functionalities, new traffic tools and improvements to the existing functionalities.

Benefits:

• Reduced vehicle blocking time

    - Multiple release distances (See Exhibit A)
    - Anticipate row exit (See Exhibit B)

• Smarter traffic management

    - Improved path rerouting

• Improved deadlock resolution and avoidance

• Improved vehicle work allocation and swapping

• Increased stability

• Improved diagnostics data

• Expanded events for statistical data collection, monitoring and reporting

• Improved vehicle communication and connection and reconnection handling

• More efficient CPU and memory resource usage

IMPROVE YOUR VALUE CHAIN
